

MATT HUTTER

Full Stack Software Engineer

MatthewJHutter@gmail.com | (360) 853-1614 | Seattle, WA

[Github](#) | [LinkedIn](#) | [Portfolio](#)

Full Stack Software Engineer with 6 years as an A/V Technician. Skilled at collaborating closely in teams with excellent communication skills, understanding technical documentation, teaching technical concepts, and customer-facing interaction. Passionate about continuous learning, climate tech, and the LGBTQ+ community.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frameworks / Tools: React, Redux, Node.js, Express.js, Flask, Pandas, AWS, Docker, REST APIs, PostgreSQL

Key Skills: Git / GitHub, Pair Programming, Test Driven Development (TDD), Software Development Life Cycle (SDLC), Agile & Scrum Methodologies, Troubleshooting & Debugging, Data Structures & Algorithms

Other Skills: Licensed Skydiver, Great Networker, Constantly Curious

EXPERIENCE

Gametime Hero | Software Engineer Intern

July 2024-present

- Collaborated with fellow software engineers to store Pickleball locations in the Seattle and Minneapolis area in a Firebase database, increasing users of the app by ~20% and engaging players in more games and events
- Refactored portions of the web app and Angular codebase to fix bugs, improve functionality, and remove unintended values, allowing places to play to be added without erroneous data and streamlining the process by ~15%

Heavy Resume | Software Engineer

April 2024 - June 2024

- Tested and reworked the build command for the PostgreSQL database to remove edge case failures, in order to improve the success rate by a full 100% and allowing the application to run
- Collaborated with 3 other developers and leveraged Python and ReactPy to build a responsive UI for user experiences outside of traditional employment in order to capture and share the potential value of the candidate

Meta (Contract) | Associate | Data & Operations

May 2023 - Feb 2024

- Troubleshoot and debugged proprietary AR/VR headset research software and cameras to reduce downtime by 50% by analyzing the command line interface and tracking errors to isolate and correct the issue
- Strictly adhered to provided technical documentation to prevent issues with equipment and software while ensuring successful and complete collections with over 95% uptime
- Manipulated and queried data sets utilizing Python, Pandas, SQL, and RegEx to better navigate the codebase

Out In Tech Digital Corps | Software Engineer

Sep 2023

- Managed the development lifecycle for an LGBTQ+ nonprofit in South Africa, leading a team of 6 developers, monitoring progress while ensuring timely deliverables and reporting progress to the project owners
- Aggregated essential contact information and developed interactive buttons on the contact page and custom footer
- Corrected layout issues in the navigation menu along with replacing photos for team members using the WordPress content management system (CMS) through block manipulation

OPEN SOURCE CONTRIBUTIONS

Software Engineer, KlimatKollen [Live Site](#) | [GitHub](#)

April 2024 - Present

An open-source and citizen-driven climate data platform aimed at visualizing climate data in Sweden

- Collaborated with an international engineering team to refactor and update data points to provide the most up-to-date and vital climate data and statistics to ~10.5 million Swedish residents
- Leveraged tools like DeepL translator, in order to refactor Swedish code as an English-speaking developer while utilizing TypeScript and Next.js

EDUCATION

App Academy

Full Stack Software Engineering

Apr - Dec 2022

University of Alaska Fairbanks

Bachelor of Arts in Psychology

Sep 2008 - May 2011
